

BEAT Windows GPU miner

BEAT

About

The Beat Token is a utility which gives the owner access to a certain amount of services regarding health and activity data based on the BEAT Blockchain. They also expect it to be used as voucher within our sports ecosystem, giving you access to goods and services as well as to be listed on secondary token exchanges.

Currently the BEAT is still in the ICO phase so please take in consideration that there is no real value in what you are mining yet.

However after a bit of investigation it looks pretty legit and has a pretty good score on ICOBench.

[Official website](#) [ICOBench Page](#)

Wallet

As the Beat Token is an ERC20 token I suggest using MetaMask.
MetaMask page

Mining Pool

You will not need to look for a pool as the tool does it all.

Tools

BEAT Miner

The BEAT miner is probably the easiest miner I've had so far. You install the tool, enter your BEAT account and press start. The tool will do the rest.

In the background the BEAT miner will mine ETH and they do the heavy lifting for you by exchanging the ETH to BEATs.

Instructions

Risks

Before mining please make sure you are aware of the risks involved.

Risks

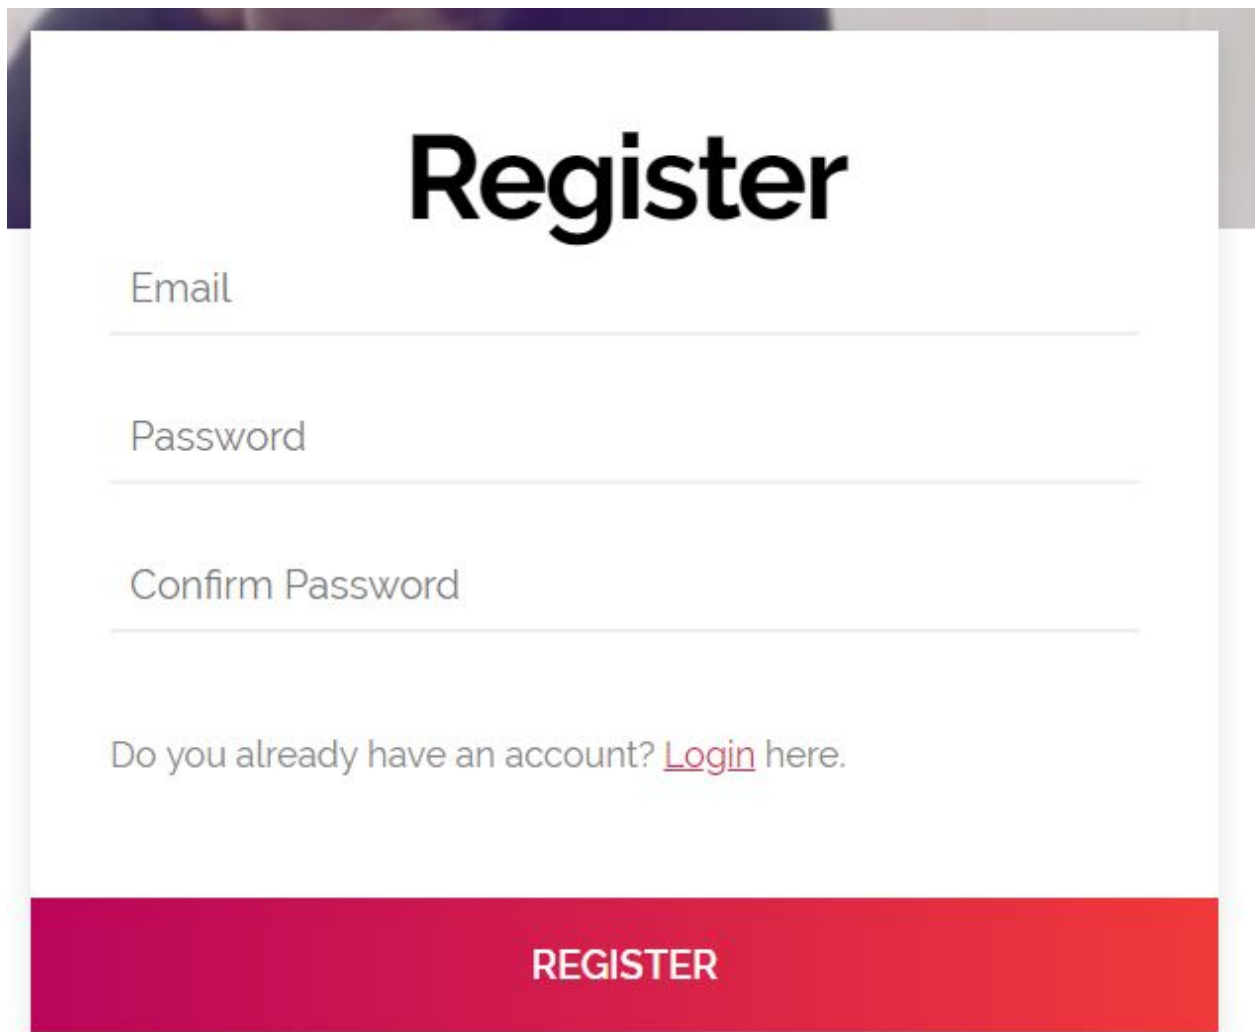

Also take in consideration that this is still in ICO phase so this Token might have no value in the end.

Registration

First you'll need to register on the website and add your ERC20 wallet adress to it.

[Registration Page](#)

- Go to the registration page and fill in your email and desired password password.

A screenshot of a web registration form. The form has a white background with a dark purple header bar. The word "Register" is written in large, bold, black font. Below it are three input fields: "Email", "Password", and "Confirm Password", each with a light gray border and a small icon to its left. Below the input fields is a link that says "Do you already have an account? [Login](#) here." At the bottom of the form is a large red button with the word "REGISTER" in white, uppercase letters.

Written instructions

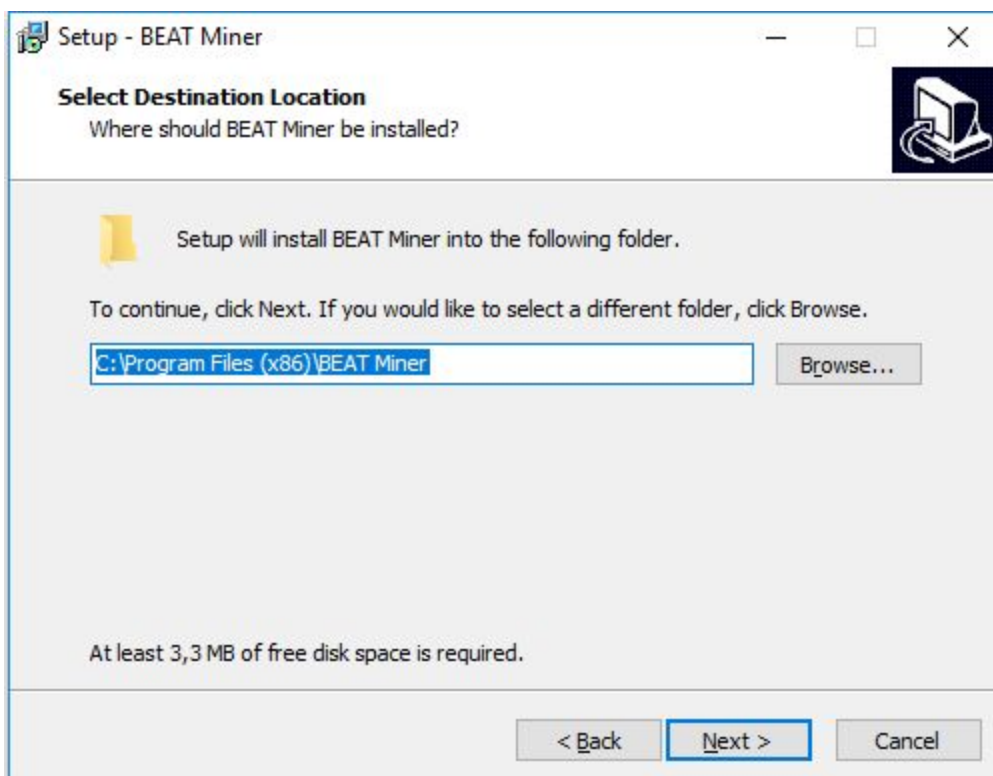

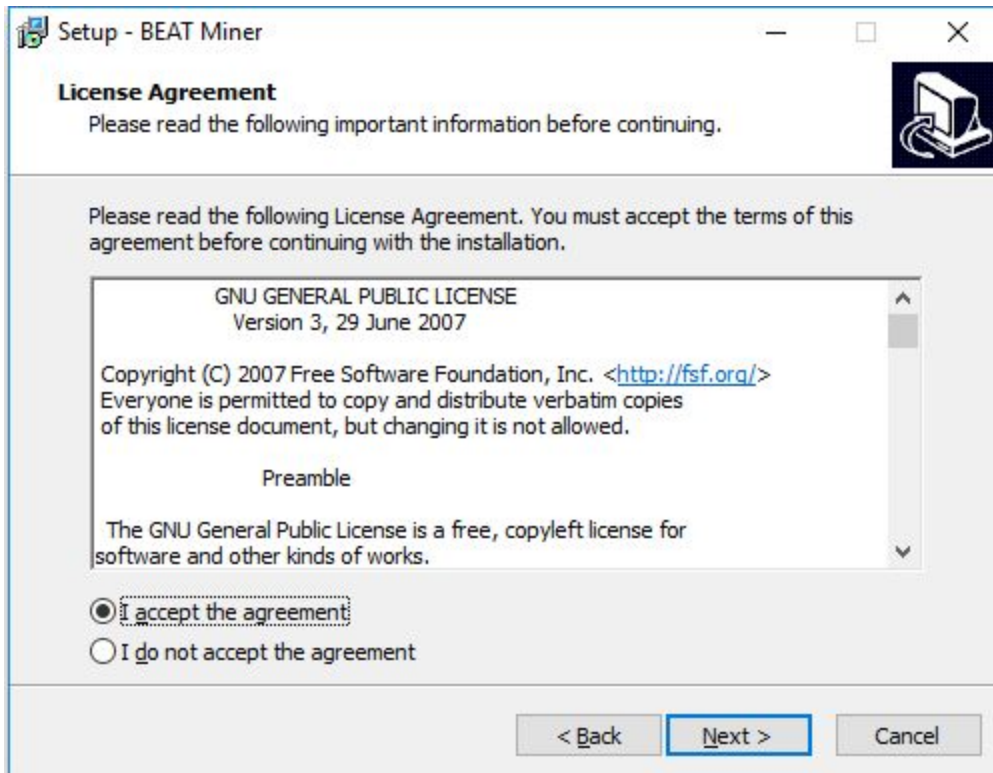

- Download the tool, you can find it on the bottom of the BEAT-mining page

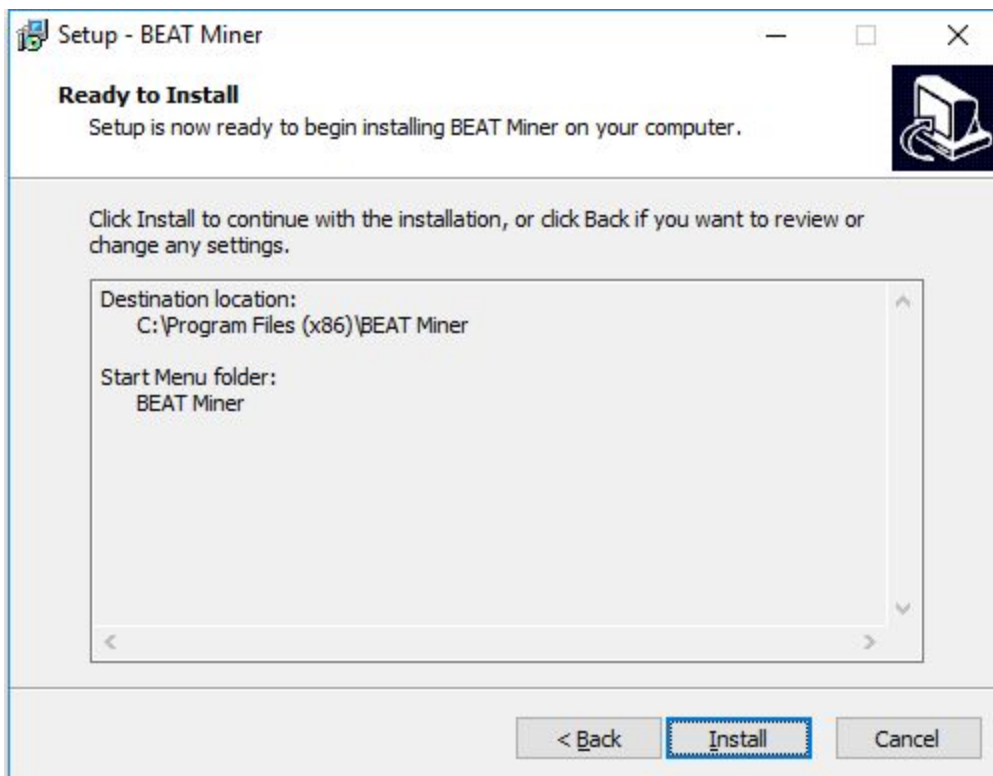

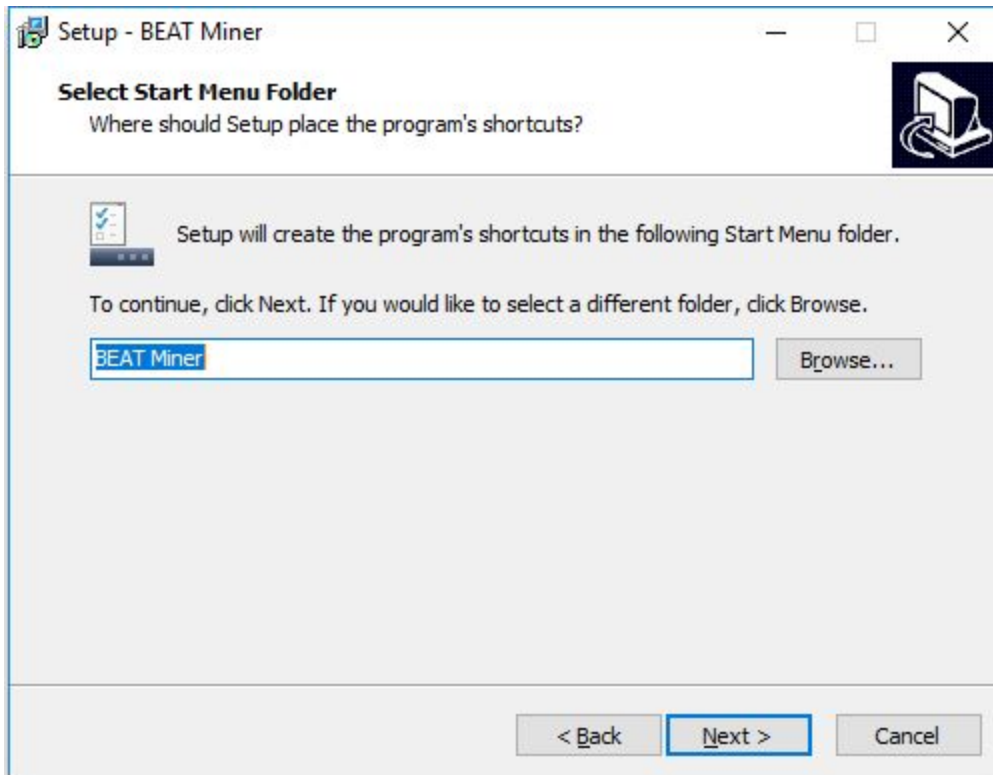

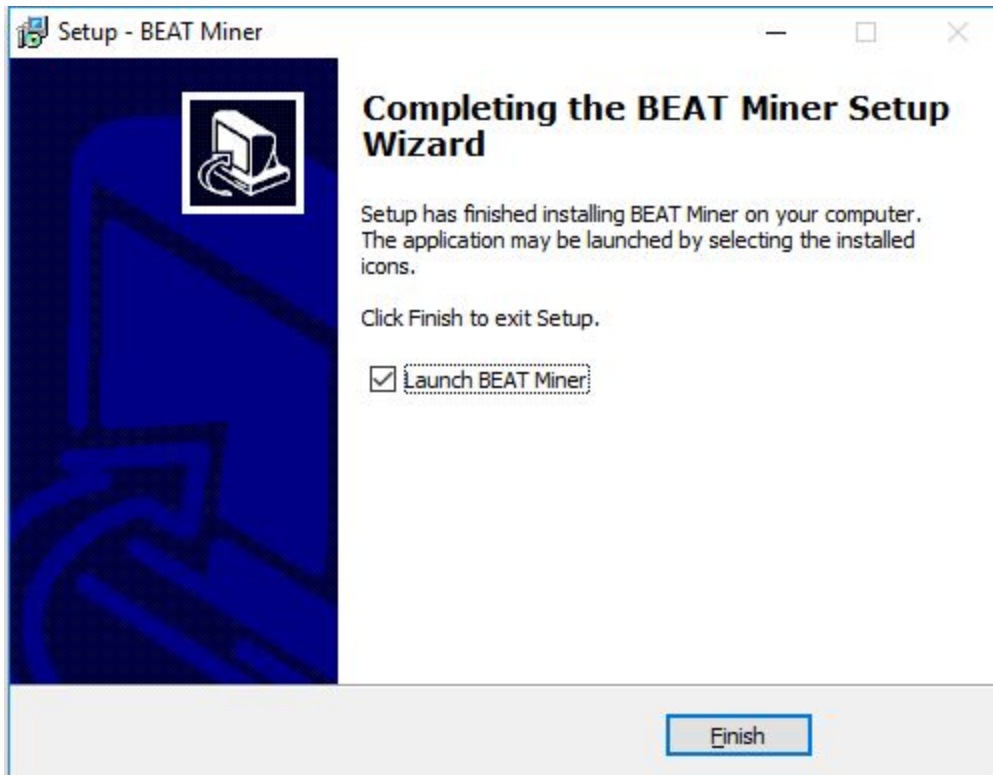

- [BEAT-mining Page](#)
- after downloading the tool it is a regular windows installer so just follow it step by step

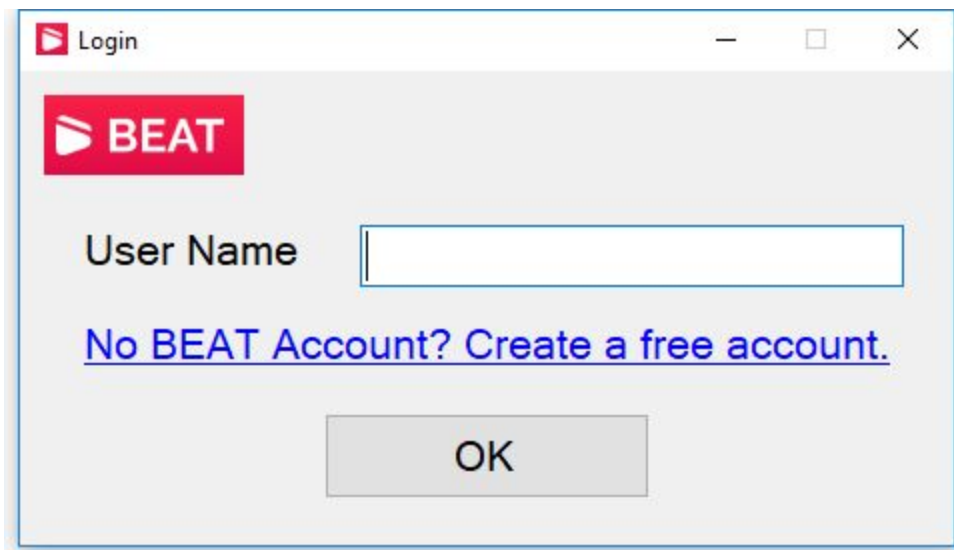

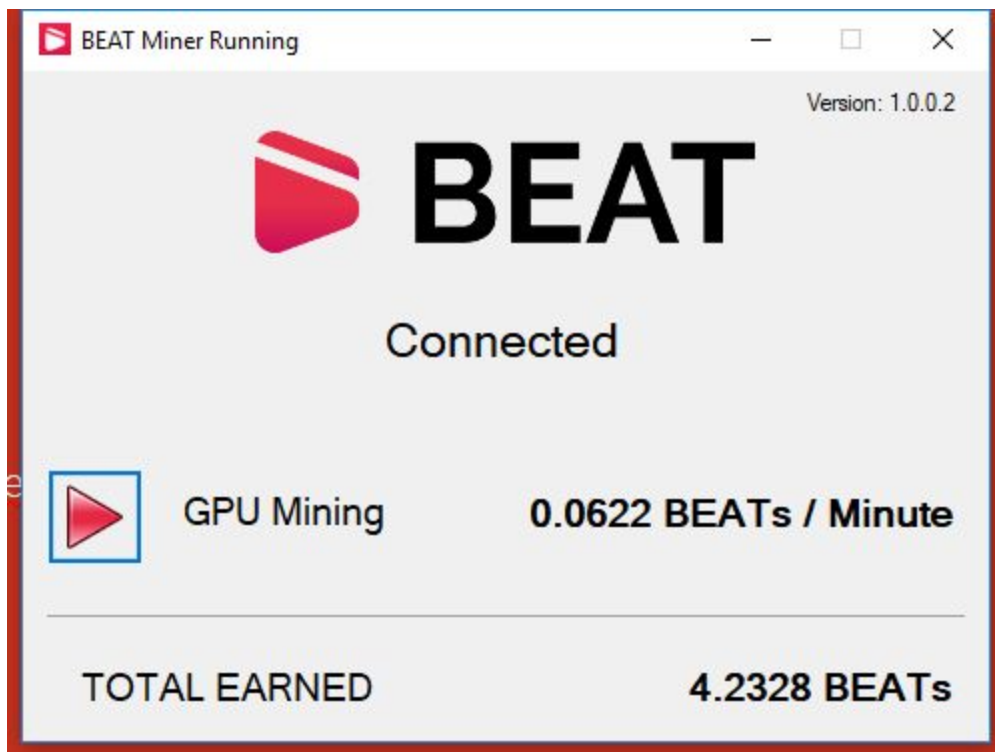

- After starting up the tool it will ask you for your username (email u used to sign up)

- Now it will go into a short initiation phase and start mining right after and you will see the amount of Tokens you already mined and the speed.
Here you can click the play or pause button to start or pause the mining.

Now you just have to let the device do its thing and gain BEATs
