

Metamask

Introduction

MetaMask is a bridge that allows you to visit the distributed web of tomorrow in your browser today.

It allows you to run Ethereum dApps right in your browser without running a full Ethereum node. Their mission is to make Ethereum as easy to use for as many people as possible.

Written Instructions

Download

Metamask is implemented in the Brave browser or a Chrome extension. On the official website you'll be able to find

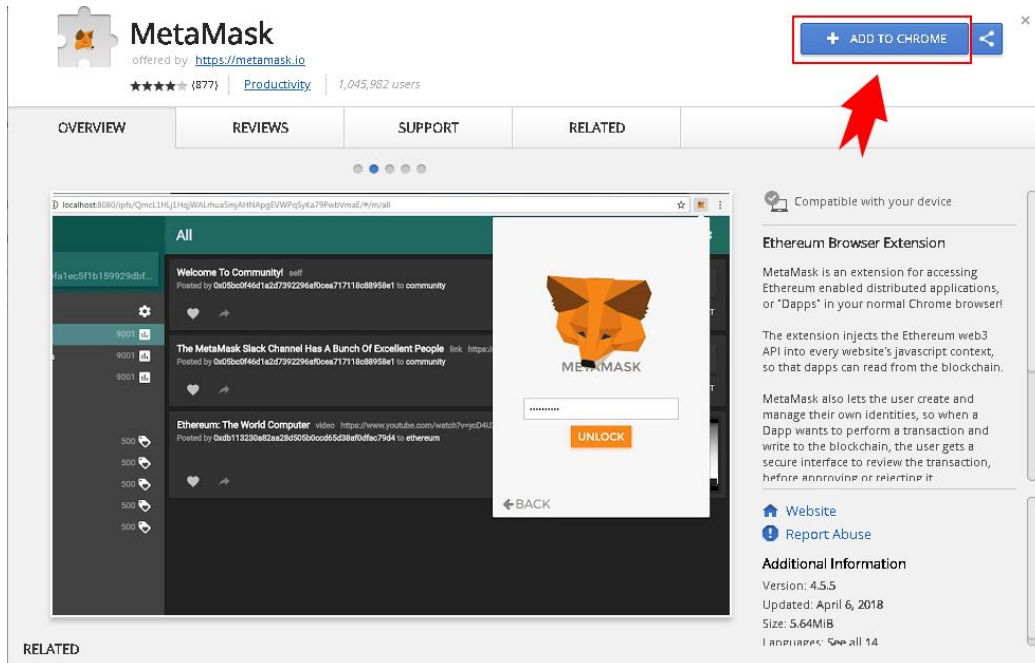

[Official website](#)

Installation
