

Electroneum Wallet

Installation guide

Download

The main wallet for Electroneum is web based, you can also get a paper (offline) wallet but you won't be able to do anything with the coins and in the end you'll always have to import it onto an online wallet, this involves fees so keep this in mind.

However the creation is very easy. First visit the Electroneum wallet website:

<https://my.electroneum.com>

Once on the website it is pretty obvious what to do, but I'll still explain in simple steps.

- Go to the Wallet website and select "Create account"

Electroneum - Wallet Manager

Welcome to the Electroneum Wallet Manager. Creating an account will automatically create you an Electroneum mobile wallet. You'll be able to access your mobile wallet via the Electroneum App on Android using the same log in details you use here.

Log in

or

Create account

- Fill in an Email and desired password or select Signing up with Facebook
I personally prefer to keep this things unlinked with social media

The screenshot shows the 'Create account' page of the Electroneum Wallet Manager. At the top, there's a dark blue header with the Electroneum logo and a language dropdown set to 'English'. The main content area has a light blue background. In the center, a white form titled 'Create account' contains a 'Sign up with Facebook' button, followed by input fields for 'Email', 'Password', and 'Repeat password'. Below these is a reCAPTCHA widget with the text 'I'm not a robot' and a 'Create account' button. At the bottom of the form, there are links for 'Already have an account? Log in' and 'Forgot / Reset Password'.

- You'll get a message to check your email and have an email in your inbox
If you can't find it make sure to look into your spam/junk folder

Account successfully created

An email has been sent to [redacted]@gmail.com. It contains an activation link, please click the link to activate your account.

Send SMS

- Set up the PIN recovery email setup, you'll have to use another email address than the one used for the wallet itself

PIN Recovery Email Setup

Before creating a PIN you need to set a PIN recovery email.

This email will only be used if you need to reset your PIN.

Your PIN recovery email must not match your primary email address (). You may use a friend or family member's email address.

If you forget your PIN, the only way you can recover it is by using the recovery email that you set here.

PIN Recovery Email

An email with a link will be sent to this email address, you will need to click this link to continue with your account setup.

[Save PIN](#)

- You are ready now and can see your wallet, and address to do transactions

Mobile App

I suggest using the Mobile app, it is very easy to use and will has a miner implemented.

You can also get a referral bonus over here.

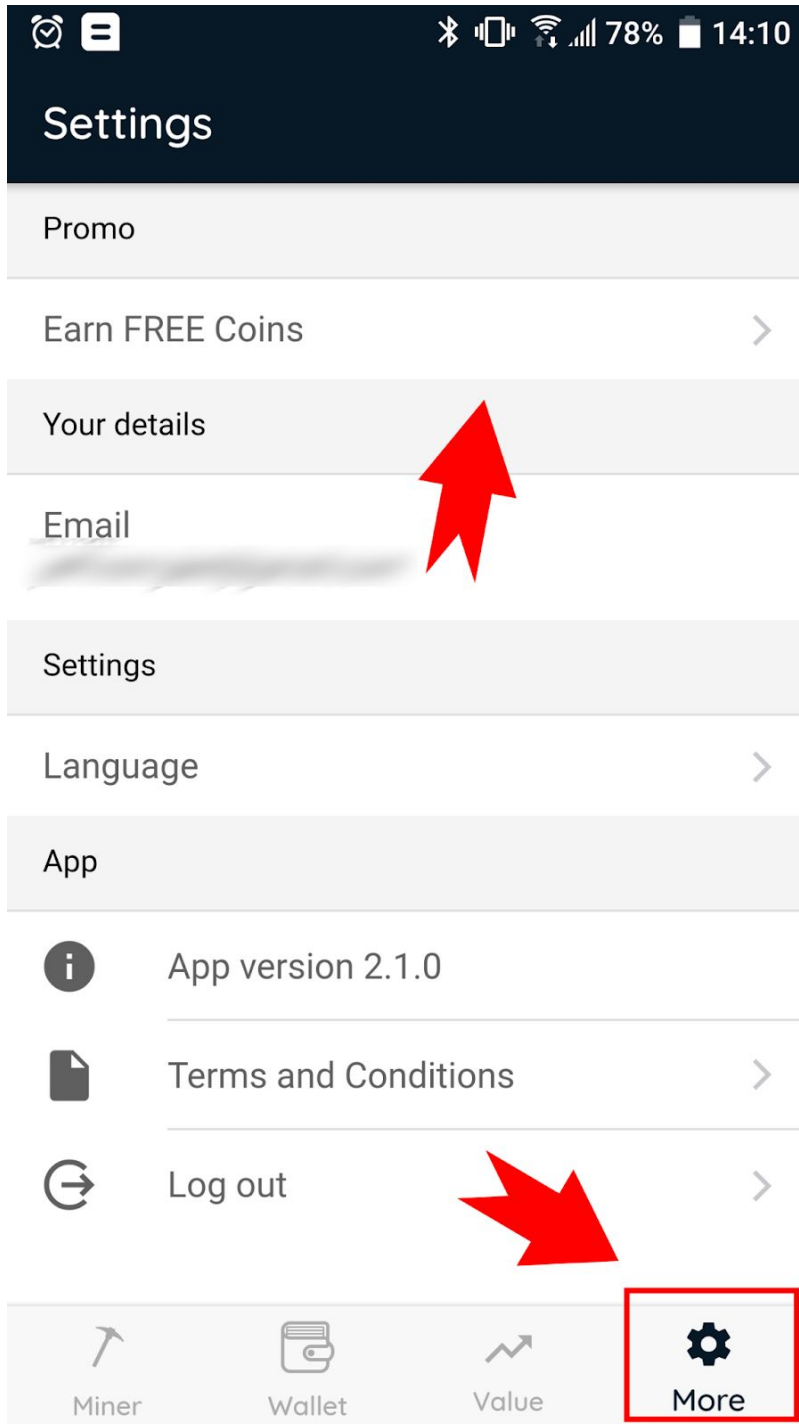

Get your mobile apps here:

Currently there is only an android app, you can find this on Google Play when looking for electroneum

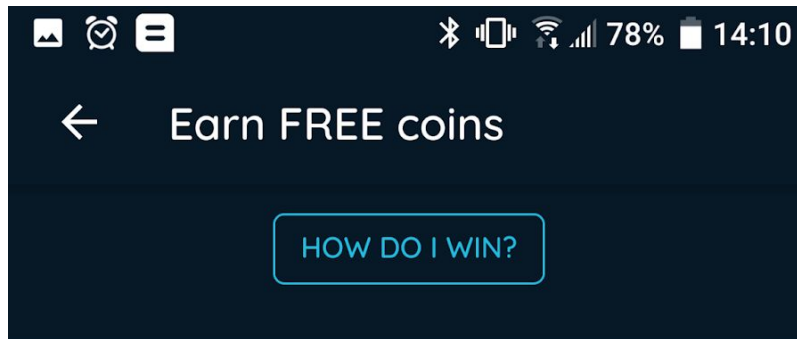

Referral

When referring enough people or being referred will get you a chance to win Electroneum so try your luck and add a referral.

- Select the more tab with the cog and here you can select "Earn FREE coins"

- Here you can get your referral code or add the code of your referrer

Your referral details

All time referrals 0

Referrals this period 0
